

Special Issue on A Life devoted to Advances in Continuum Mechanics of Material and Structural Behavior

Guest Editors: Marcus Aßmus · Victor A. Eremeyev · Andreas Öchsner

ORIGINAL ARTICLES

- 873 M. Aßmus, V.A. Eremeyev, A. Öchsner:
Foreword
- 877 M. Marin, A. Öchsner, S. Vlase:
Behavior of energies in strain gradient thermoelasticity of bodies with microtemperatures
- 893 V.A. Eremeyev, W. Pietraszkiewicz:
Nonlinear resultant theory of shells accounting for thermodiffusion
- 911 F. Kiarasi, M. Babaei, R. Dimitri, F. Tornabene:
Hygrothermal modeling of the buckling behavior of sandwich plates with nanocomposite face sheets resting on a Pasternak foundation
- 933 A.V. Porubov, A.K. Belyaev, V.A. Polyanskiy:
Nonlinear hybrid continuum–discrete dynamic model of influence of hydrogen concentration on strength of materials
- 943 S. Burzyński:
On FEM analysis of Cosserat-type stiffened shells: static and stability linear analysis

ORIGINAL RESEARCH

- 969 M. Bacciocchi, N. Fantuzzi, A.J.M. Ferreira:
Static finite element analysis of thin laminated strain gradient nanoplates in hygro-thermal environment
